This La Crosse Wind Weather station is a very affordable weather forecasting system that can measure, process and display an assortment of weather information for the true weather enthusiast.

This stylish wireless touch screen weather station has many features including wind speed and direction, a barometric pressure tendency arrow, forecasting icons (clouds, rain, sun, etc), based on changing barometric pressure. However its greatest feature is the fact that it connects directly to a PC allowing users to store weather information.

Other features of the Wind Weather station include: easy to read LCD display, radio controlled clock and calendar (controlled by the Frankfurt antenna (DCF-77)), multiple weather alarms, an Alarm setting with snooze function and a weather forecasting function

This interactive touch screen wind weather station offers an impressive range of features and high accuracy and everything is made so simple with the wireless connection. There is also a RS232 serial cable and "Heavy Weather" PC software included to link directly to your home or office computer allowing you to store and view, days, weeks, months and years worth of data. View trends and create graphs to get a visual idea of historical weather data.
